

3D-FEATURES SCULPTURED EMOTION. ENGINEERED PRECISION.

3D-Features transform genuine hardwood veneer into architectural surfaces that engage your senses – bringing emotion, movement, and precision into unique interiors.

Real wood. Three dimensions.

Crafted from high-quality veneer, 3D-Features preserve the warmth, authenticity, and richness only real hardwood can provide.

Designed for simplicity and confidence.

A complete interior system, simple installation: All you need is a standard twist drill and our custom-made templates.

Creative freedom. Unique surfaces.

Modular elements can be rotated, reoriented, and combined to create elegant wall and ceiling compositions. For surfaces that fit the room, not a standard.

Consistent at any scale.

Designed for high-end residential, hospitality, marine, and commercial environments where engineered precision matters.

Responsibly sourced.

Manufactured in Germany, using FSC®-controlled wood. Less material. Lightweight for simpler logistics. Made to stay, not to be replaced.

One system. Endless possibilities.

Available in American Walnut and American White Oak across four signature designs. Near-infinite variety – the consistency of an engineered product.
