

SPLICED FACES
BY DANZER
CLEVERLY
CRAFTED.
EFFORTLESSLY
SPLICED.

Composed from genuine wood and defined with precision, Danzer Spliced Faces bring the warmth and character of natural veneer into ready-to-use surfaces.

Carefully selected sheets are arranged and spliced into defined layouts that preserve authentic grain and depth. Finished to exact specifications before delivery, they provide defined surfaces with predictable results from boutique runs to industrial volumes – combining natural beauty with built-in efficiency.

Designed With Intent

Veneer sheets are carefully arranged and spliced into defined layouts that guide the eye, preserving the natural grain, depth, and character of real wood.

Predictable And Reliable

Consistent yields, dependable quality, and short lead times reduce operational risk, support accurate cost planning, and provide confidence across projects of any scale.

Wide Variety, Full Flexibility

Available in a broad range of species, cuts, formats, and thicknesses, Spliced Faces enable design freedom across boutique runs and industrial production alike.

Convenience Built In

Finished to exact specification and delivered ready for use, reducing in-house effort, working capital, and production complexity.
