

LINEA

PRODUCT SPECIFICATION

Linea is a technical cut-to-size veneer with a linear, rift-type look. Carefully selected, high-quality veneers of the same wood species are glued together, and new, uniform veneers are sliced from this beam, resulting in a consistent linear or rift pattern.

Linea is never blended with wood species, nor is it bleached or colored, preserving the natural appearance of the species. Thus, it captures the depth and light reflections characteristic of natural wood grain. Slight natural color variations underline the authentic character of real wood, making every project truly unique.

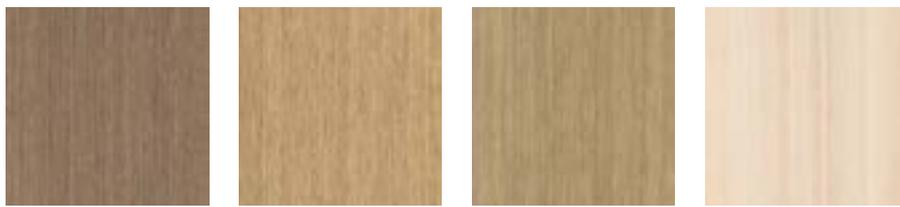

Made from **FSC®-controlled wood** off-sized veneer sheets, Linea is available in several true species and fixed dimensions.

STANDARD DIMENSIONS (CUSTOM DIMENSIONS BY REQUEST)

LENGTH	2,600 mm	(8.5')
	3,100 mm	(10.1')
	3,660 mm	(12.0')
WIDTH	650 mm	(2.1')
THICKNESS	(-0.6 mm)	(-0,028')

SPECIES ON STOCK (OTHERS BY REQUEST)

American Walnut

American Oak

European Oak

European Birch

* As for any organic material, the results obtained from the fuming/smoking process will naturally range in color and show various degrees of darkening within each of the Linea veneer sheets.

Silver Birch

Black Birch

European Larch

European Larch Fumed*

European Ash White-Brown

European Ash White

European Oak Fumed*

Teak (100% FSC)

The mark of responsible forestry

PROCESSING INFORMATION

All Linea products can be milled, stained and lacquered like any veneer of the respective species. We recommend using temperatures not exceeding 130°C (266 F) for further processing. Sheets are provided in raw form without any paper/phenolic backing.
