

SPLICED FACES

PRODUCT SPECIFICATION

Spliced Faces complement Danzer's premium raw veneer range. We manufacture custom-specific, high-quality veneer faces—including technically demanding constructions—tailored to your application. Our core focus is **panel and door faces** in North America and Europe, as well as **furniture and thick-cut faces** in Europe. Beyond these, we supply primarily the panel and furniture industries, and also support **interior fit-out, acoustic panels, wrapping applications, flooring, tables, and project/contract doors, including high-end custom solutions.**

From small to mid-sized volumes, spliced faces are available in a wide selection of **species and grades**, backed by Danzer's extensive sliced-veneer inventory. Customers benefit from **better yield and lower cost** through **reduced waste**, plus time savings thanks to efficient sourcing and procurement.

Spliced veneer faces are supplied in **industry-standard door, panel, and furniture dimensions.** All Danzer-supplied **North American, European, and exotic species** (hardwood and softwood) are available, and veneer from trusted third-party sources can be integrated to ensure the broadest possible supply base.

Glue options are available upon request. Most products are available as controlled wood; selected items are also offered as **PEFC™, SFI,** or **FSC® 100%.**
