

Danzer

Facts & Figures

Danzer is a producer of primary hardwood products; value added wood products and related services.

PRODUCT RANGE

- Sliced wood
- Sawn wood
- Timber and logs
- Services, Specialties (Vinterio, 3D-Veneer)

52 % of the revenue is made with sliced wood,
29 % of the revenue with sawn wood,
19 % of the revenue with logs, specialties and services.

Danzer products are not sold to end users but to manufacturers, distributors and component producers.

Danzer is organized by business units for products and regions; every business unit runs its own production and sales operation.

ORIGIN OF RAW MATERIAL

59 % North America
34 % Europe
6 % Africa
1 % other regions

MARKET POSITION

- Largest producer of decorative veneer worldwide
- Among the top ten producers of lumber in North America

For comparison: Annual consumption of wood worldwide: 3.5 bn cubic meters

- half of that is used for energy
- 1.8 bn cubic meters are used industrially

Danzer processes about 260,000 cubic meters annually; this equals 0.014 % of the global harvest for industrial use

OPERATIONS
