

3D-VENEER BASIC

STRONG
ECONOMIC
EFFECTIVE
SIMPLE

3D-Veneer has successfully pushed the limits of bending and forming hardwood veneers. For various applications, a basic version of the proven material is the perfectly adequate solution.

DANZER 3D-VENEER BASIC

provides all characteristics to make 3D-molded parts even more cost-effective, e.g. for inner layers of molded shells, moldings for upholstered chairs or as a stylish, stripy looking 3D surface.

PRODUCT INFORMATION

Species: Beech

Thickness: 1.2 mm or 2 mm

PROCESSING INFORMATION

3D-Veneers can be glued, sanded and milled like any other veneer.

Our team of experts will support you in all phases of your project: from discussing the initial design idea to prototyping, optimizing, tooling and the reliable use and delivery of 3D-Veneers.
