

A close-up photograph of several layers of sliced flooring deck material. The layers are stacked and slightly offset, showing the natural wood grain and the thickness of each slice. The color is a warm, light brown. The text 'SLICED FLOORING DECK LAYERS' is overlaid in white, sans-serif font in the upper right quadrant.

SLICED FLOORING DECK LAYERS

Danzer has invested in new technology to slice wood at much higher thicknesses than possible in the past. The resulting lamellas are mainly used as

SLICED FLOORING DECK LAYERS

but are also a credible alternative to the use of solid wood on furniture. The advantage of slicing, compared to sawing, is: little to no waste, as the entire log is sliced into useable material. As our deck layers are sliced from logs, we can efficiently produce longer and wider boards, customer specific and ready to use.

PRODUCT INFORMATION

Standard program in 3 mm:

- European Oak
- European White Ash
- European Brown Ash
- European Larch
- Sapelli FSC 100 % certified
- American Walnut
- American Black Cherry
- American Hard Maple

Other species and thicknesses on request.
